Message

“I am pleased to inform you that the Jain Engineering Society (JES) has been actively working towards its goal of promoting the welfare of society. We have been able to achieve significant milestones in our various initiatives aimed at supporting education, healthcare, and community development.

Our scholarship program for poor students has provided financial support to numerous students, enabling them to pursue higher education and achieve their dreams. Our healthcare camps have helped in providing medical aid to people in need, and our support to old age homes has brought a smile to the faces of many senior citizens. Our community development programs have created awareness about social issues and helped in creating a positive impact in society.

I would like to take this opportunity to express my gratitude to all our volunteers, donors, and supporters who have helped us in achieving our objectives. Without your support and contributions, we would not have been able to make such a significant impact in society.”
